

Ultrafast Soft Recovery Diode 15A 600V trr ~ 35 ns

Features

Ultrafast Recovery

175°C operating junction temperature

Designed and qualified for industrial level

Description/Applications

These diodes are optimized to reduce losses and EMI/RFI in high frequency power conditioning system. The softness of the recovery eliminates the need for a snubber in most applications.

These devices are ideally suited for HF welding power converters and other applications where switching losses are not significant portion of the total losses.
